Academic Details

- **Bachelor of Technology in Computer Science (B.TECH)**
  Babu Banarsi Das Engineering college, Lucknow;
  CGPA: 7.15

Soft Skills

Analytical | Collaborator | Leader | Adaptable

Technical Skills

- **Programming Languages:**
  Java, core and advanced
- **Frameworks:**
  Spring , Spring Boot, Hibernate, and React.

Core Competencies

Data Structures and Algorithms

Software Development Life Cycle

Restful API

Debugging

Project Management

Web Services

Communication and Collaboration

Performance Optimization

Continuous Learning and Adaptability

Personal Details

Date of Birth: 28th NOV 2001
Languages Known: English, Hindi
Address: Sector 27 Noida, UP

Profile Summary

- Graduated in 2023 with a Bachelor's degree in Technology from Babu Banarasi Das Engineering College, Lucknow, specializing in full-stack development.
- **Proficient in Java, React.js, Angular, HTML, CSS, and JavaScript, with a strong background in backend development using Spring Boot and SQL, MYSQL.**
- Certified in Data Structures in Java, enhancing my understanding and application of efficient algorithms**.**
- Passionate software engineer excited to bring technical expertise, problem-solving skills, and enthusiasm to a reputable organization.
- Demonstrated strong coding skills and the ability to solve complex problems efficiently, contributing to team projects and collaborating effectively with peers.
- Utilized RESTful API design and implementation to create scalable and maintainable web services.

Academic Projects

Movie API	March 2024

Tools: React, Spring Boot, MongoDB, Java Programming

Developed a comprehensive Movie API Application featuring a React.js frontend and a Spring Boot backend. The project involved implementing RESTful services for data handling and integrating a responsive user interface for seamless user experience.

Responsibilities:

- Designed and developed the Movie API using Spring Boot for backend services, ensuring efficient data retrieval and management.
- Implemented a responsive React.js frontend to create a seamless user interface for browsing and searching movies.
- Integrated RESTful APIs to connect the frontend with backend services, facilitating smooth data exchange and user interactions.

Banking System	April 2024

Tools: HTML, CSS, JS, Java, Spring, SPRINGBOOT, My SQL

Developed a robust Banking System Application with a html, css, js frontend and a Spring Boot backend. The project focused on secure transaction management, user authentication, and providing a seamless interface for users to manage their accounts and transactions.

Responsibilities:

- Developed secure backend services using Spring Boot to manage user authentication and transaction processing.
- Created an intuitive HTML, CSS, JS frontend to enable users to efficiently manage their accounts and view transaction histories.
- Implemented robust security measures, including data encryption and secure API communication, to ensure data integrity and user privacy.

Academic Achievements

- Achieved certification in Data Structures in Java, demonstrating a strong understanding of efficient data management and algorithm design.
- Gained hands-on experience in Java, React.js, Angular, HTML, CSS, and JavaScript through academic projects and coursework.
- **Completed Notable Projects** such as a Campus Recruitment Analysis tool and a Movie API Application, demonstrating practical application of complex concepts.
